

Corpus-Creation Guidelines

Product Review Translation Guidelines

Core Principle: Colloquial & Natural

Your primary goal is to create a translation that sounds **natural, informal, and fluent**, as if a native speaker wrote it as a product review. You must prioritize conveying the **correct sentiment and style**.

1. Style, Tone, & Grammar

This is the most important section. We are translating *spoken-style* text, not formal writing.

- Use Colloquial Language

This means using the modern, urban, spoken version of the language, not the formal, literary, or "textbook" version.

- **YES:** Use common contractions and spoken-style spellings.

- **Kannada Example:** Use ಮಾಡ್ತಾನೆ (māḍṭāne) instead of ಮಾಡುತ್ತಾನೆ (māḍuttāne), or ಅನ್ನೋದು (annōdu) instead of ಅನ್ನುವುದು (annuvudu).

- **YES:** Use nativized words.

- **Example:** "lagging" can become लैग कर रहा है (laig kar rahā hai).
 - **Example:** "killer" can be translated as too good or its equivalent.

- Relaxed Grammar & punctuation

The translation does not need to follow perfect, standard grammatical rules.

- Word order can be flexible if it sounds more natural in speech.
 - Full stops (.) are often not necessary at the end of a review.

- Commas (,) and exclamation marks (!) are common and should be used to preserve the original's feel.
- Preserve Sentiment & Intent

The translation must match the sentiment (positive, negative, sarcastic) and tone of the original review.

 - **Source:** crazy phone it is really ossum
 - **Intent:** The user is very happy. The translation should reflect this positive excitement.

2. Handling English & Domain-Specific Words

Using English words (code-mixing) is a key part of this colloquial style and is allowed

- Do Not Translate Common Terms

Many technical, e-commerce, and common English words should be kept in English (either in Latin script or transliterated). Translating them literally often sounds formal and unnatural.

- **Keep as-is:** mobile , privacy , display , charging , performance , smooth , capture , review , update , five stars , killer , average .
- **Example:** in this mobile privacy not secure...
- **Translation (Hindi):** इस mobile में privacy secure नहीं है... (This is more natural than इस चल दूरभाष में निजता सुरक्षित नहीं है).
- Transliteration (Your Choice)

You have the flexibility to either keep the English word in its original script or transliterate it into your language's script. Both are correct, and having a mix is good.

 - **Example:** Asus can be Asus (Latin) or आसुस (Devanagari).
- Idioms & Sarcasm

Translate idiomatic phrases to a culturally equivalent phrase in the target language that conveys the same intent.

- **Example:** "A game-changer"
 - **Hindi Intent:** परिस्थिति बदल देने वाला उत्पाद (paristithi badal dēnē vālā utpād)
-

3. Handling Formatting & Errors

- **Source-Side Errors**

The original review may have spelling or grammar errors (e.g., froud policy, plez). Do not translate the error. Your final translation should be a fluent, informal sentence that captures the author's intended meaning.

- **Emojis & Units**

- All emojis (👍, 😊, 😞) must be kept exactly as they are.
- Units (like mAh) should be kept as-is.

- **Proper Nouns**

- Names of companies or products (e.g., Flipkart, Myntra, Asus) should be kept in their original form or transliterated. Do not translate them.
